Choosing A Local Food Producer Has Benefits

Griffith Farm & Market makes frozen meals homemade and healthier

Griffith Farm & Market can provide frozen meals to local programs that make this service available to people in their communities. Here are some of the benefits we can offer as a local food producer.

Healthier Choice: Griffith Farm & Market does not use additives or preservatives when preparing frozen meals. No salt or sugar is added. For a comparison, see page four for nutrition content and an ingredient list.

Flexible Ordering Options: There are no minimum orders for any product. Meals are packaged as per the amount ordered.

Lower Environmental Impact: Griffith Farm & Market products are produced in their Golden Lake kitchen (health unit inspected twice annually). There is one form of packaging (vacuum-sealed or container). There is no additional use of plastics, packaging or shipping.

A Local Partner: As a long-time member of various regional farmers' markets, Griffith Farm & Market can be a partner in promoting the frozen meals program, which can assist local agencies in spreading the word.

Menu Suggestions: One of our best sources of new menu items is our customers! If there are entree requests or preparation options, Griffith Farm & Market wants to hear them. There are many opportunities to add to the menu.

A Trusted Producer: Griffith Farm & Market has a certified kitchen that is inspected twice a year by the local health unit. They also invest in nutritional labels for products and continuously invest in ways to improve their value.

The local frozen meals program can be delivered by a local farm, at an affordable cost, with healthier food and to the greater benefit of our community residents.

Roast Pork Dinner: Slices of pork loin with mashed potatoes and gravy. Served with maple glazed carrots.

How To Heat Our Frozen Meals

Entrees are fully cooked and are best when heated from frozen.

Before heating the meal in the oven or microwave, pull back a corner or cut a slit in the film to vent.

Oven: Preheat oven to 350 F and heat for approximately 45 minutes.

Microwave: 3-5 minutes on high.

Do not use a toaster oven to reheat meals. Do not heat the tray to more than 400 F.

Please note that oven and microwave heat times may vary.

About Our Meals

All meals are made with lean beef from our farm. Our beef cattle are grass fed with a little mixed grain to produce the best tasting meat. The meat is hormone and antibiotic free.

Chicken is raised as free-run resulting in a flavorful meat.

Meals are made individually with no preservatives or fillers. We **do not** use pastry to fill our pies; just 100% protein and vegetables.

We do not add salt or sugar to any of our meals.

Frozen meals can be kept up to four months in the freezer.

About Our Farm

Griffith Farm & Market is a third-generation family farm operated by Kevin and Margaret Ann Griffith. The farm is located on Highway 60, the main highway to Algonquin Park. We are just 45 minutes to the park gate. Our pasture-raised cows and free-run chicken roam in the fresh outdoors making them healthy and happy. We do not use growth hormones or antibiotics. We produce real food that we serve at our own table every day.

Meal Planning Made Easy!

Some ideas of side dishes you can add to any meal

Griffith Farm & Market meals are hearty dishes because all ingredients are fresh with no fillers. While often enough on their own, having salad, rolls or buns and some vegetables (ie: broccoli) can easily accompany our meals.

For example, with buns you could add to any of our soups, a pasta dish and use for pulled chicken on a bun. A side salad could accompany meatloaf, maple squash pie and a pasta dish. Many of our meals come with sides; for those that don't, your choice of sides would work with any of our meals.
