

On the journey to an inclusive society, people with intellectual and developmental disabilities are now present in all aspects of our communities. This information session will explore "what's next?"

Dr. David Pitonyak shares successful strategies for seizing opportunities and building new relationships with other people and places in our community to facilitate social change and full citizenship.

DR. DAVID PITONYAK, PhD

Consultant, Trainer

David Pitonyak is interested in positive approaches to difficult behaviours. He believes that difficult behaviors are "messages," which can tell us important things about a person and his/her surroundings.

Understanding the "meaning" of an individual's difficult behaviors is the first step in supporting the person (and their supporters) to change.

"Working with David allows us to engage in a new conversation about complex and challenging situations. Hearing and being part of many people's stories allows him to share a rare expertise."

- Spectrum Consulting, Burnaby, BC
